(Up to date) Technical Specification of (Winding & Beam Dyeing) Machines

A - Specification of Beam Winding and Rewinding Machine

- 1- No 1 set.
- 2- Fabric width (75 – 220) cm.
- 3- Types of fabric (cotton, viscose, polyester & blends).
- 4- Dry Fabric weight (25 – 100)gm/m².
- 5- Machine's speed up to 80 m / min..
- 6- Work by tension instrument containing edge grips to fix winding regularity.
- 7- Weight of the using Fabric with the beam not less than 700 kg.
- 8- Diameter of flange will be appropriate with beam dyeing machine.
- 9- Supplying a Crain for lifting the product or beam itself with all necessary accessories .
- 10- Supplying 1 mobile sewing machine , use for connecting two pieces of cloth during the winding with all necessary Accessories & Spare part.

B- Specification of Beam Dyeing Machine

- 1- No 1 set.
- 2- Fabric width (75 – 220) cm.
- 3- Types of fabric (cotton, viscose, polyester & blends).
- 4- Dry Fabric weight (25 – 100)gm/m².
- 5- Machine capacity up to 500 kg dry fabric .
- 6- Homogeneous bath penetration and circulation.
- 7- No. 2 Mobile dye beams carriers.
- 8- Max. dyeing temp. 140°C / At 4.5bar .
- 9- Accessories :
 - 4 Beams.
 - Mixer .
 - Chemical's tank with tank level control with pressure transmitter..
 - Trolleys no. 2. Roller (A frame) no . 2 Hydraulic Jack no. 1
 - Any accessories suitable integral for the production.
- 10- Capability of dyeing based receipt by means of industrial PLC.
- 11- Inside/Outside circulation controlled with differential pressure transmitter (In / Out & Out / In circulation offered).
- 12- CCR (Combined Cooling and Rinsing).

- 13- All the specify used materials (metal , valves , pipes , etc...) should meet the international standards.
- 14- Main control cabinet supplied with protection devices against local frequent interruption (cut-off) in electric power supply.

General Requirements:

- 1- 3 Phase Power,(380-400 V), 50 HZ
- 2- All Machines from Origin of western and Japan .
- 3- Installation and Erection include mechanical , electrical & utilities work commissioning, start –up , operating & training inside & outside (origin country) should be done by supplier, Operations are achieved by enough no. of experts from the same supplier company for the mentioned stages of the work.
- 4- All documents and catalogues for production, spare parts, insulation and maintenance in English should be supplied.
- 5- Training for (6 persons for 3 weeks) in the machine Origin country . The training period expenses (pocket money)in additional of the traveling expenses from /to Iraq to origin country should be paid by the machine's supplier.
- 6- Guaranty for one year .
- 7- Spare parts for 3% of contract amount will be listed after training period and discussion with supplier .
- 8- Supply a documents confirm the company bidder is the Manufacturer .
- 9 -An official documents confirm that the Manufacturer produce and sold this type of range to another countries .

Option :

Supplying appropriate compressor machining machine specification (screw type , 10 bar , Q 5m³ / min) with dryer .
