Currently, all radioactive material (radioactive waste and sources, some nuclear material, all Cat. III or less) is stored in the "Bunker B". A new radioactive storage facility is being constructed and all radioactive material shall be moved to this new storage in the Radioactive Waste Complex (RWC)

The Contractor shall supply and deliver to the Iraq Ministry of Science and Technology (MST) the equipment to establish and/or improve physical protection measures at the following locations: (i) Bunker B, (ii) Protected Area Main Gate, (iii) Radioactive Waste Complex (RWC). Further, a communication system (fibre optic cable, VoIP handsets, etc) shall be established connecting all three locations
