Rehabilitation of D1 Waste Water Treatment Plant in Tameem - Anbar Governorate

To perform the proposed services, the Contractor will work in close coordination and consultation with the technical team and UNDP Project Engineer.

The Contractor is required to perform/execute construction and supply and installation of all other requirements according to the Bill of Quantities, and Technical Specifications.

The Contractor shall visit the designated site to become familiar with the condition of the work areas, the vicinity and the free space available for doing the work and storage of materials required for the execution of work. It is the bidders' responsibility to do research about the terrain and geographical conditions of the site before submitting bids.

In general, the Contractor should become familiar with all prevailing conditions and circumstances which may affect the manner in which he will perform the work.

The prices proposed by the Contractor in the bill of quantities after the site visit shall be considered to include all that is required to carry out the work under the local conditions and the foreseeable and unforeseeable expenses which will be required to complete the work.

The Contractor shall implement the Project based on a detailed work plan which shall be approved by the Project Engineer. The contractor is expected to produce/perform works which conforms in quality/quantity and accuracy of detailed specification. The Contractor is to institute a quality control system to ensure adequate monitoring of the works progress at all times.
