Section A. Background, Scope of Work, Deliverables and Deliverables Schedule

A.1. Background

The USAID-funded Ta'afi Program is working towards a more inclusive and prosperous Iraq by empowering Iraqis to lead positive change. Ta'afi does this by working with Iraqi partners to organize the community to address local issues and mobilize around common causes affecting all of Iraq. In order to measure and gauge the effectiveness of Ta'afi's programming and identify potential windows of opportunity for engagement, Ta'afi will need to periodically evaluate the Iraqi public's opinion and perception of civic engagement. Therefore, a subcontractor will support Ta'afi by implementing a quantitative national and regional data collection campaign. The work will include developing a detailed data collection plan, recruiting and training of data collection agents, collecting data from households in 4 key regions (Mosul, Sinjar, Nasiriyah, and Basra city) and nationally, and translating and cleaning of final collected data.

A.2. Scope of Work

Under this subcontract, Ta'afi staff and the subcontractor will work together to design an in person quantitative national and regional data collection around community perceptions and participation in civic engagement. Ta'afi and the subcontractor will develop the survey questions (approximately 15-20 questions), and both will monitor data collection results in real-time to determine if adjustments need to be made to ensure the final data is representative of the Iraqi public.

Geographic Coverage

Surveys will be conducted in a manner that is statistically representative of the national population of Iraq. The subcontractor will follow the methodology included in their proposal to ensure this. Additionally, regional data will be collected from Mosul, Sinjar, Nasiriyah, and Basra city, as these are key programming regions for Ta'afi. The subcontractor will recruit and engage data collection agents according to the approved recruitment and staffing plan. Agents should be able to access the identified areas and communicate in the relevant local language with a variety of actors on the ground, including women and youth and other generally underrepresented demographics and perspectives (e.g., ethnic minorities).

Implementation Phases

Following award, the works under this subcontract will be implemented in the following phases, in accordance with the approved Technical Approach and Methodology and according to the timeline in the Detailed Work Plan.

Phase 1 – Kick-off Meeting (within 7 calendar days of subcontract signature)

The subcontractor will participate in a one day start-up conference to be held with Ta'afi staff **in Erbil in person**. At a minimum, the subcontractor's key personnel must attend and participate in the session. This session will be organized by the subcontractor, and the agenda will be prepared by Ta'afi and shared with the subcontractor in advance. The agenda will broadly focus on introductions between team members, a presentation on Ta'afi program strategy, and a discussion on standard operating procedures for collaboration. A central part of the session will be to ensure mutual understanding of the survey purpose and questions and to identify roles and responsibilities of the subcontractor and Ta'afi key staff involved in the management of the subcontract. Prior to the session, Ta'afi will provide the subcontractor with a draft of the approximately 15-20 survey questions. It is anticipated that the same survey will be used for both regional data collection and national data collection, but adjustments may be made to this approach following the kick-off discussion or in the initial phases of Phase 4. The questions will be discussed together

during the kick-off meeting for any suggestion and feedback along with the methodology, approach, and timeline for the entire project.

Phase 2 – Finalization of Methodology and Detailed Work Plan

The subcontractor will use feedback and discussion points from the kick-off meeting to finalize the survey questions and tools, detailed work plan (with specific dates), data collection methodology and approach, and recruitment and staffing plan, as needed. Changes made to any of these documents – as compared to the original proposal documents – will be highlighted in the new submissions.

Phase 3 – Recruitment and Training of Data Collection Agents

The subcontractor will use the approved recruitment and staffing plan from Phase 2 to identify and engage data collection agents across Iraq. The subcontractor will organize and hold a training for the agents, which will follow the training agenda approved under Phase 2. A member of the Ta'afi team will participate in the training to provide support and background on the purpose of the data collection if needed.

Phase 4 – Data Collection

The subcontractor will set up data collection and database tools and software (Kobo collect, ODK, or similar), which will allow for tracking and monitoring data collection progress in real time. Ta'afi will be given access to this database at the beginning of the data collection period. The data collection agents will begin conducting the survey across Iraq in accordance with the data collection methodology and approach approved under Phase 2. There will be an initial test period, which will provide an initial representative sample of data from multiple geographic locations, which will be reviewed by Ta'afi and the subcontractor to determine if adjustments or modifications are needed to the approach or survey questions. Throughout data collection, Ta'afi and the subcontractor will monitor the collected data and make minor improvements or adjustments to ensure accurate and thorough survey responses are properly captured. Ta'afi reserves the right to stop or pause data collection, pending significant changes or improvements in methodology or data results.

Phase 5 – Data Translation and Cleaning

As survey results are being collected and recorded, they will be translated from Arabic to English (into a separate data set). The data entries will be regularly reviewed and cleaned, and any entries containing incomplete, inaccurate, or otherwise irrelevant information will be removed. All the final cleaned data and sample size should remain statistically significant in terms of locations, gender, themes and topics, as discussed and approved in Phases 1 and 2.

A.3. Deliverables

The Subcontractor shall deliver to Chemonics the following deliverables, in accordance with the schedule set forth in Section A.4, below.

Deliverable No. 0: DBA Invoice

Each regional data set and the national data set will be separated and labeled as such.

Deliverable No. 6: Cleaned and Translated Final Data Sets
