INTRODUCTION TO UNHCR

The Office of the United Nations High Commissioner for Refugees was established on December 14, 1950 by the United Nations General Assembly. The agency is mandated to lead and co-ordinate international action to protect refugees and resolve refugee problems worldwide. Its primary purpose is to safeguard the rights and well-being of refugees. It also has a mandate to help stateless people.

In more than six decades, the agency has helped tens of millions of people restart their lives. Today, a staff of some 15,000 people in more than 128 countries continues to help about 70 million persons. Annex A – Scope of Work (SOW)

HCR/IRQER/2023/ITB-004

FOR THE CONSTRUCTION OF A WATER NETWORK IN FAIDA AND SHARYIA, FAIDA SUB DISTRICT, DUHOK, IRAQ.

Scope of Work (SOW):

The water network in several areas in Faida and Shariya Towns is poorly conditioned, below standards, broken, and leaking in many places. The size of pipes and their conditions causes to loss of water as well as extremely low water pressure to several large areas within the two towns (which leaves many families with no potable water in the network).

According to UNHCR data, the area hosts over 30,000 refugees of Syrian and non-Syrian nationality in both camp and non-camp locations, in addition to IDPs nearby. The proposed location is thus strategic and accessible by refugees, IDPs, and host communities in the surrounding areas.

Expanding the water network in some parts of Gulan sector-Faida and Regava sector - Shariya, and by replacing the old broken pipes in both locations. Given the transition of WASH facilities to the municipality/line ministry, this is a timely intervention such that it would enable the line ministry to deliver services in a sustainable manner, provide families with water regularly, and thus promote hygiene among residents in the area, and prevent communicable diseases within the population linked to poor hygiene and WASH practices linked to unavailability of water. It will also support families because they would not have to purchase water frequently when there are shortages. Lastly, by supporting the rehabilitation of pipes, there would be a decrease in water wastage in an environment where critical water shortages are expected.

UNHCR is planning to construct the water networks in Faida and Sharia by executing the below activities:

Requirements:

The work includes:

- Demarcation, Clearing, and grubbing of the site.
- Excavation of trenches for the pipes.
- Supply and installation of the pipes.
- Provision and installation of valves, and manholes.
- Connection of the new pipes to the source of water.
- Backfilling the excavated trenches, and sealing the roads as detailed in the BoQ and the specifications.
